and helical gears for quiet running and give efficiency above 75%. This enables them to transmit three times the power from a given motor to the track, or put another way, use a motor developing a third of the power to do the same job. The motors we use are smaller so the motor gearbox can be fitted easily, leaving more space

### '0' Gauge Gearboxes

The gear ratios will provide prototypical scale speeds.. As with our standard gearboxes it is also fitted with a 4mm pillar at the back under the motor where a fork piece can be attached to the chassis and fitted over this pillar to support and restrain rotational movement whilst allowing the gearbox to float with the locomotive suspension.

Our vision, to become the supercluster for leading brands and talent in the performance apparel and gear space. On September 2016, the BC Alliance for Manufacturing released an Apparel Industry labour market report, where it was revealed that apparel is the fourth largest component of manufacturing in British Columbia.

### BC Apparel & Gear Association

Table 7-2 Commonly used diametral pitches . Instead of using the theoretical pitch circle as an index of tooth size, the base circle, which is a more fundamental circle, can be used.The result is called the base pitch p b, and it is related to the circular pitch p by the equation (7-8) 7.5 Condition for Correct Meshing. Figure 7-5 shows two meshing gears contacting at point K 1 and K 2.
