Human Cognitive Evolution: How the Modern Mind Came into Being - Merlin DonaldAnatomy Edifice Mind Explanation Thoughts

A thought is an electrochemical event taking place in your nerve cells producing a cascade of physiological changes. The article "How Your Thoughts Program Your Cells" explains it this way: There are thousands upon thousands of receptors on each cell in our body. Each receptor is specific to one peptide, or protein.

The idea of deeper levels of information processing was developed and extensively studied by famous Austrian psychologist Sigmund Freud (1856 – 1939) who introduced the 3 level mind model. According to his model, the mind could be divided into following levels: Three-level mind model Conscious – defines all thoughts and actions within our awareness.

~~What Is The Subconscious Mind? | Motions~~

While an important partner in the triad of the human mind, the conscious mind serves as a scanner for us. It will perceive an event, trigger a need to react, and then depending on the importance of the event, store it either in the unconscious or the subconscious area of the human mind where it remains available to us. Freud’s Subconscious Mind

From the time of Francis II the form of the edifice lets the geometrical outline show through more and more, like the bony framework through the skin of an emaciated body. The generous curves of art give place to the cold and inexorable lines of geometry. An edifice is no longer an edifice, it is a polyhedron.

~~It, This Will Destroy That, Book V, Hugo, Victor Marie---~~

From where does this "I" arise? Seek for it within; it then vanishes. This is the pursuit of wisdom. When the mind unceasingly investigates its own nature, it transpires that there is no such thing as mind. This is the direct path for all. The mind is merely thoughts. Of all thoughts the thought "I" is the root. – Ramana Maharshi

There was a deeper aspect to the mind--namely, the unconscious (later divided into the id and ego). The conscious mind was but the tip of the iceberg; the unconscious, the vast unseen mass below. The latter accounted for the darker and more-animal tendencies and actions of man. Author Mark Twain put it well when he remarked, "Every man is a moon.
