Climate Change

And Food

Security

Besides

geographic and

economic

inequality,

there is another

looming threat

Access Free Climate Change

And our global
food security –
the climate
crisis. Climate
change affects
our agricultural
system in many
ways and
threatens to
cause
significant
decreases in
crop yields.

Access Free Climate Change

“increasingly
disrupt
agricultural
productivity,”
threatening not
only farmers’
livelihoods but
also food
security,
quality, and
price stability.

A brief guide to

Access Free Climate Change

the impacts of
climate change
on food . . .

Chapter 7, "Food security and food production systems," details the current effects of climate change, the expected decline in crop production by

Access Free Climate Change

2030 as a result of climate change, and what farmers can do to mitigate some of the negative impacts. As stated by the chapter authors: "The questions for this chapter are how far climate and its change affect

Access Free Climate Change

current food
production
systems and food
security and the
extent to which
they will do so
in the future."

How will climate
change affect
food security?

Climate change
