Close Up Photography in Nature. You are seeing this butterfly about twice it's normal size. John took this beautiful image with a 100mm macro (close-up) lens and Kodak 800 Max film. Exposure was f11 at 1/500th, hand-held! See how this self-proclaimed "serious amateur" manages to generate these marvelous, first-rate images.

Nature Closeup | Photography Course

A huge advantage close-up photography offers is that it doesn't matter where you live, there are unlimited subjects to photograph all year long. Weedy fields, marshes, ponds, and forests all offer numerous subject that vary through the day and during the year.

REVIEW: Close Up Photography in Nature, by John and ...

Alberto's aim is to show beauty in the smallest details. Getting close to nature is something most photographers of the natural world would regard as fundamental. After all, they want to capture a place full of wonder and beauty, and to do this properly they must immerse themselves within it. But few photographers can claim to take the process to the limits that Alberto Ghizzi Panizza has done in his body of work.

Extreme macro photography opens up a new world for photographers, particularly biologists. By photographing subjects way beyond just life size magnifications, this book takes you a step closer to the very cells that make up organisms. Written with clarity and detail, Julian Cremona's book is the perfect guide and sister title to Extreme Close-Up Photography and Focus Stacking. His enthusiasm for and knowledge of his subject makes this book an essential companion for everyone interested in photography and discovering the minutiae of the natural world. Advises on equipment and on low-cost and DIY photography solutions. Explains how to use a microscope and its potential for photographers. Instructs how to light, support and prepare a subject for best results. Covers focus stacking: how to produce composite images with incredible depth of field. Encourages experimentation and suggests ways to develop extreme close-up ideas. A superb guide to taking stunning, detailed photographs at x5 to x30 magnification and more. Captures nature as rarely seen before. Will be of great interest to photographers, biologists, naturalists, scientists and natural historians. A natural companion title to Extreme Close-Up Photography and Focus Stacking.
