Contains analyses that are designed to highlight specified subject areas or provide other significant presentations of budget data that place the budget in perspective. Includes economic and accounting analysis; information on Federal receipts and collections; analyses of Federal spending; detailed information on Federal borrowing and debt; baseline or current services estimates; and other technical presentations. Also includes a CD-ROM with tables previously published in the budget documents, along with summaries of new performance assessments and updates on earlier assessments for approximately 600 Federal programs.

The most cutting-edge read on the pricing, modeling, and management of credit risk available The rise of credit risk measurement and the credit derivatives market started in the early 1990s and has grown ever since. For many professionals, understanding credit risk measurement as a discipline is now more important than ever. Credit Risk Measurement, Second Edition has been fully revised to reflect the latest thinking on credit risk measurement and to provide credit risk professionals with a solid understanding of the alternative approaches to credit risk measurement. This readable guide discusses the latest pricing, modeling, and management techniques available for dealing with credit risk. New chapters highlight the latest generation of credit risk measurement models, including a popular class known as intensity-based models. Credit Risk Measurement, Second Edition also analyzes significant changes in banking regulations that are impacting credit risk measurement at financial institutions. With fresh insights and updated information on the world of credit risk measurement, this book is a must-read reference for all credit risk professionals. Anthony Saunders (New York, NY) is the John M. Schiff Professor of Finance and Chair of the Department of Finance at the Stern School of Business at New York University. He holds positions on the Board of Academic Consultants of the Federal Reserve Board of Governors as well as the Council of Research Advisors for the Federal National Mortgage Association. He is the editor of the Journal of Banking and Finance and the Journal of Financial Markets, Instruments and Institutions. Linda Allen (New York, NY) is Professor of Finance at Baruch College and Adjunct Professor of Finance at the Stern School of Business at New York University. She also is author of Capital Markets and Institutions: A Global View (Wiley: 0471130494). Over the years, financial

professionals around the world have looked to the Wiley Finance series and its wide array of bestselling books for the knowledge, insights, and techniques that are essential to success in financial markets. As the pace of change in financial markets and instruments quickens, Wiley Finance continues to respond. With critically acclaimed books by leading thinkers on value investing, risk management, asset allocation, and many other critical subjects, the Wiley Finance series provides the financial community with information they want. Written to provide professionals and individuals with the most current thinking from the best minds in the industry, it is no wonder that the Wiley Finance series is the first and last stop for financial professionals looking to increase their financial expertise.

Managing Credit Risk, Second Edition opens with a detailed discussion of today's global credit markets—touching on everything from the emergence of hedge funds as major players to the growing influence of rating agencies. After gaining a firm understanding of these issues, you'll be introduced to some of the most effective credit risk management tools, techniques, and vehicles currently available. If you need to keep up with the constant changes in the world of credit risk management, this book will show you how.

At a cost of \$500 billion to American taxpayers, the savings and loan debacle of the 1980s was the worst financial crisis of the twentieth century as well as a crime unparalleled in American history. Yet the vast majority of its perpetrators will never be prosecuted, and those who were have received minimal sentences. In the first in-depth scrutiny of the ways and means of this disaster, this groundbreaking book comes to disturbing conclusions about the deliberate nature of this financial fraud, the political collusion involved, and the leniency of the criminal justice system in dealing with these "Gucci-clad white-collar criminals." Using material from over one hundred interviews with government officials and industry leaders and recently declassified documents, the authors show how—contrary to previous government and "expert" explanations that chalked the disaster up to business risks gone awry or adverse economic conditions—S&L leaders engaged in deliberate fraud, stealing from their own corporations to speculate on high-risk ventures. Tempted by the insurance net, perpetrators looted their own institutions in a new kind of white-collar crime the authors dub "collective embezzlement." *Big Money Crime* also demonstrates how systematic political collusion—not just policy errors—was a critical ingredient in this unprecedented series of frauds. Bringing together statistics from a variety of government agencies, the authors provide a close reading of the track record of prosecutions and sentencing and find that "suite crime" receives much more lenient treatment than "street crime," despite its significantly higher price tag. The book concludes with a number of modest, but no less urgent, policy recommendations to counter the current deregulatory trend and to avert a replay of the S&L debacle in other financial sectors. FROM THE BOOK: "We built thick walls; we have cameras; we have time clocks on the vaults . . . all these controls were to protect against somebody stealing the cash. Well, you can steal far more money, and take it out the back door. The best way to rob a bank is to own one."—House Committee on Government Operations, 1988

Praise for *Fair Lending Compliance Intelligence and Implications for Credit Risk Management* "Brilliant and informative. An in-depth look at innovative approaches to credit risk management written by industry practitioners. This publication will serve as an essential reference text for those who wish to make credit accessible to underserved consumers. It is comprehensive and clearly written." --The Honorable Rodney E.

Hood "Abrahams and Zhang's timely treatise is a must-read for all those interested in the critical role of credit in the economy. They ably explore the intersection of credit access and credit risk, suggesting a hybrid approach of human judgment and computer models as the necessary path to balanced and fair lending. In an environment of rapidly changing consumer demographics, as well as regulatory reform initiatives, this book suggests new analytical models by which to provide credit to ensure compliance and to manage enterprise risk." --Frank A. Hirsch Jr., Nelson Mullins Riley & Scarborough LLP Financial Services Attorney and former general counsel for Centura Banks, Inc. "This book tackles head on the market failures that our current risk management systems need to address. Not only do Abrahams and Zhang adeptly articulate why we can and should improve our systems, they provide the analytic evidence, and the steps toward implementations. Fair Lending Compliance fills a much-needed gap in the field. If implemented systematically, this thought leadership will lead to improvements in fair lending practices for all Americans." --Alyssa Stewart Lee, Deputy Director, Urban Markets Initiative The Brookings Institution "[Fair Lending Compliance]...provides a unique blend of qualitative and quantitative guidance to two kinds of financial institutions: those that just need a little help in staying on the right side of complex fair housing regulations; and those that aspire to industry leadership in profitably and responsibly serving the unmet credit needs of diverse businesses and consumers in America's emerging domestic markets." --Michael A. Stegman, PhD, The John D. and Catherine T. MacArthur Foundation, Duncan MacRae '09 and Rebecca Kyle MacRae Professor of Public Policy Emeritus, University of North Carolina at Chapel Hill
