Access PDF Differences Between Scilab And Matlab

While MATLAB's Window version is better, Octave runs better in Linux than in Windows. Scilab is 98% compatible with MATLAB, and it is free too. But a paper says that its performance is less consistent than MATLAB's or Octave's in most situations. The number of toolboxes is smaller than that for MATLAB or Octave.

The main difference between Scilab and Matlab function is that they do not use the same input values to build an Hankel matrix. If in Matlab, you just have to give a column vector (and eventually a row

Access PDF Differences Between Scilab And Matlab

vector), Scilab function requires the size of the Hankel matrix to build and a covariance sequence vector for this matrix.
