Research Basics: Design to Data Analysis in Six Steps offers a fresh and creative approach to the research process based on author James V. Spickard's decades of teaching experience. Using an intuitive six-step model, readers learn how to craft a research question and then identify a logical process for answering it. Conversational writing and multi-disciplinary examples illuminate the model's simplicity and power, effectively connecting the "hows" and "whys" behind social science research. Students using this book will learn how to turn their research questions into results.

Introduction to Ethnographic Research streamlines learning the process of research, speaks to the student at a foundational level, and helps the reader conquer the apprehensions of mastering research methods. Written in a conversational style, authors Kimberly Kirner and Jan Mills use a focus on scaffolding across the chapters to help the student transition from step to step in the research process. Case studies and first-hand accounts are also featured in each chapter, allowing the student to see the early steps, successes and at times failures that accomplished researchers experienced in their past. These real examples further encourage the student that even the best researchers failed along the way, and more importantly, learned from those mistakes. This text is designed to be used as a stand alone book, but is enhanced by the use with the supplemental workbook, Doing Ethnographic Research by the same authors. This text has call-outs to the supplemental text, which allow for application and practice of the material learned. INSTRUCTORS! Doing Ethnographic Research: Activities and Exercises by Kimberly Kirner and Jan Mills is \$5 when you bundle with the core text, Introduction to Ethnographic Research: A Guide for Anthropology. Use bundle ISBN: 978-1-5443-9989-8

The Pulitzer Prize-winning co-author of *Flags of Our Fathers* searches for American childhood, exploring its fate over the past century. 30,000 first printing.
