This model is the transfer function which representing fracture-matrix interaction. Many formulas for this function had been presented since the 1960s. In this work, a review for these formulations was done.

Fracture-matrix transfer function in fractured porous media
Drug-drug interactions Inhibitors. If 2 substrates (drugs) are taken together that are broken down by the same CYP enzymes, they may interact with each other in negative ways. For example, 2 substrates (A & B) will compete for a CYP enzyme and the strongest inhibitor, A will bind to the enzyme causing B to become inhibited by A.

Synapsely - Nootropics Research
Stars and Their Fates. In general, the larger a star, the shorter its life, although all but the most massive stars live for billions of years. When a star has fused all the hydrogen in its core, nuclear reactions cease. Deprived of the energy production needed to support it, the core begins to collapse into itself and becomes much hotter.

Fire Emblem Wiki - a definitive source of knowledge for ...

A "Springlock failure" is one of the many incidents that has happened at Fazbear entertainment restaurants over the years. These incidents occur when the locks, that are holding the endoskeleton in the folded position, break. This causes the endoskeleton to spring into its usual position, anyone caught inside the suit when this happens will be impaled and crushed by the parts.

Springlock Suit | Five Nights At Freddy's Wiki | Fandom

Left figure: TruST is composed of four steel cables (1), connecting a pliable belt (2), with the motor/spools (3), through pulleys (4). Cable tensions are measured with springs and load cells (5).
