Whether or not Jesus was involved with the Zaslott movement of armed resistance to Rome is the provocative question this collection attempts to answer. Twenty-six articles concentrate on four areas: methodology, the historical situation, New Testament exegesis, and the trials of Jesus before the Sanhedrin and Pilate.

Unlock the Windows of Heaven God heals believers not only physically, emotionally, and spiritually, but financially, as well. Speaking from personal experience with overcoming financial hardships, best-selling author Joan Hunter shares biblical wisdom and shows you how to: See miraculous breakthroughs Overcome poverty and loss Become debt-free Prosper in the midst of adversity Have all your needs met Apply wealth-building secrets Thrive in uncertain times You can walk in God's abundant blessings.

You've prayed for deliverance—you've forgiven those who have hurt or abused you—and yet you're still nursing the painful wounds of your past. Does this describe your experience? Many Christians have suffered unspeakable trauma and wonder why they aren't experiencing the freedom God has promised. The reason is that trauma goes deeper than the mind. It infiltrates the body at the cellular level, and only a deliverance that deals with the whole man—soul, spirit, and body—will treat the trauma and set you free—completely free. Speaking as one who has received miraculous healing herself and also ministered it to others, Christian author and healing expert Joan Hunter demonstrates how to find true freedom through such methods as... Cursing cellular memory of rape and other forms of sexual abuse Escaping the stress that wears you down Renewing your mind with the mind of Christ Forgiving those who have harmed you Learning to love yourself Accepting the unconditional love of your heavenly Father As you break free from the bondage of trauma and pain, you will walk in deliverance and discover your true identity as a beloved child of God. You can be healed and whole! Start the recovery process today.

One day when Jesus was teaching, "the power of the Lord was present for Him to heal the sick" (Luke 5:17). His same power is present in every believer today. Drawing from her experience as a worldwide healing ministry, Joan Hunter desires to help equip the church to receive and to minister God's miraculous healing in the four corners of the world. Many believers want to understand: How can I receive and retain healing? Why would God use me? What's the best way to approach someone who needs healing? How can I effectively pray for healing? The answers to these and other questions—plus practical guidance and examples—are designed to help believers fulfill the Great Commission: "Go into all the world, and preach the gospel to every creature... lay hands on the sick, and they shall recover...."(Mark 16:15, 18b).

"We received more miracle reports when Joan Hunter was a guest on It's Supernatural! than from any other interview." —Sid Roth, Host, It's Supernatural! TV

Every year, thousands of students go to university to study mathematics (single honours or combined with another subject). Many of these students are extremely intelligent and hardworking, but even the best will, at some point, struggle with the demands of making the transition to advanced mathematics. Some have difficulty adjusting to independent study and to learning from lectures. Other struggles, however, are more fundamental: the mathematics shifts in focus from calculation to proof, so students are expected to interact with it in different ways. These changes need not be mysterious - mathematics education research has revealed many insights into the adjustments that are necessary - but they are not obvious and they do need explaining. This no-nonsense book translates these research-based insights into practical advice for a student audience. It covers every aspect of studying for a mathematics degree, from the most abstract intellectual challenges to the everyday business of interacting with lecturers and making good use of study time. Part 1 provides an in-depth discussion of advanced mathematical thinking, and explains how a student will need to adapt and extend their existing skills in order to develop a good understanding of undergraduate mathematics. Part 2 covers study skills as these relate to the demands of a mathematics degree. It suggests practical approaches to learning from lectures and to studying for examinations while also allowing time for a fulfilling all-round university experience. The first subject-specific guide for students, this friendly, practical text will be essential reading for anyone studying mathematics at university.
