How not to shoot a monkey: video analysis of a classic ...

The Monkey and the Hunter June 20, 2013 Thought experiments abound in the world of physics, often revealing some of the most confusing aspects of quantum mechanics, relativity, and thermodynamics. But the "Monkey and the Hunter" thought experiment tackles a relatively well-understood topic: gravity.

The Monkey and the Hunter | PhysicsCentral

Problem: A hunter fires a dart gun with a harmless sedative at a monkey hanging from a vine a distance h vertically above the dart gun and a distance R horizontally away from the dart gun. The hunter aims directly at the monkey and fires, but just as the hunter fires, the monkey, using its incredible spider-monkey sense, realizes what's up and drops from the vine.

The monkey and hunter demonstration is on a wheeled table with the elevation of the gun controlled by a crank. The gun is fired by compressed air from a pressure cooker tank. A laser beams through the gun barrel so all can see where the straight line of the gun-aim is directed.

40. Monkey and Hunter | UCLA Physics & Astronomy

The 'monkey-and-hunter' experiment. Practical Activity for 14-16 ... The hunter could be down on the ground while the monkey is on a high branch. Imagine a straight line from the gun to the monkey; as the bullet flies through the air, its downward acceleration pulls it down below this line. After the demonstration, ask the students to suggest how a wiser monkey might have acted. This ...

The 'monkey-and-hunter' experiment | IOPSpark

Source: UCLA physics lab manual. So, do you think the hunter should aim the gun: Above the monkey? At the monkey? Below the monkey? Before reading on, take a moment to come up with your answer. Thought about it? This problem has somewhat of an amusing legacy. In an effort to revamp physics problems to fit more environmentally enlightened times, textbook authors have taken great pains to ...

How not to shoot a monkey: video analysis of a classic ...

Description The "gun" is aimed at the monkey and shot. As the projectile leaves the muzzle of the gun it breaks a circuit producing the magnetic field which holds the monkey in place. The monkey then begins to fall at the same time the projectile is fired directly at the monkey.

C2-22. Monkey and Hunter | Physics Lab Demo

The Monkey and the Hunter. This investigation may be just the introduction you need to two-dimensional motion. In a twist on the classic "monkey and hunter" demonstration, students can move the rifle left and right, or even up and down, and vary the muzzle velocity in their quest to miss the monkey. (Don't worry. We at GigaPhysics like monkeys, and we use only a harmless foam "bullet" ...
