At the outset of the twenty-first century, more than 9 million people are held in custody in over 200 countries around the world. --from the essay "Prisons and Jails" by Ron King The first comparative study of this increasingly integral social subject, International Handbook of Penology and Criminal Justice provides a comprehensive and balanced review of the philosophy and practicality of punishment. Drawn from the expertise of scholars and researchers from around the world, this book covers the theory, practice, history, and empirical evidence surrounding crime prevention, identification, retribution, and incarceration. It analyzes the efficacy of both traditional methods and thinking as well as novel concepts and approaches. Beginning with a study of the changing attitude of penal practice in Florida from one of offender transformation to one of risk-management, imprisonment, surveillance, and control, this volume embarks on an objective and sober appraisal of every aspect of the field. Contributions consider the sociology of incarcerated prisoners including the increasing prevalence of prison suicides. The book evaluates arguments regarding the world-wide abolition of capital punishment from moral, utilitarian, and practical positions. It examines non-incarcerative and alternative punishments such as financial restoration and restrictions of liberty, as well as the positive effects of Victim Offender Mediation. It also considers several methods aimed at achieving measurable crime prevention including identifying at-risk juveniles and minimizing crimes of opportunity, as well as the pros and cons of employing the coercive power of police. Further essays consider subjects such as international policing, the roles of prosecution and defense attorneys, current discretionary sentencing practices, and the role and treatment of victims. The volume concludes with two chapters of case studies that provide a "hands-on" feel for the interplay of the concepts discussed. This volume is the first in a three-part trilogy. The Routledge Handbook of International Criminology brings together the latest thinking and findings from a diverse group of both senior and promising young scholars from around the globe. This collaborative project articulates a new way of thinking about criminology that extends existing perspectives in understanding crime and social control across borders, jurisdictions, and cultures, and facilitates the development of an overarching framework that is truly international. The book is divided into three parts, in which three distinct yet overlapping types of crime are analyzed: international crime, transnational crime, and national crime. Each of these perspectives is then articulated through a number of chapters which cover theory and methods, international and transnational crime analyses, and case studies of criminology and criminal justice in relevant nations. In addition, questions placed at the end of each chapter encourage greater reflection on the issues raised, and will encourage young scholars to move the field of inquiry forward. This handbook is an excellent reference tool for undergraduate and graduate students with particular interests in research methods, international criminology, and making comparisons across countries.

The Psychology of Criminal and Antisocial Behavior: Victim and Offenders Perspectives is not just another formulaic book on forensic psychology. Rather, it opens up new areas of enquiry to busy practitioners and academics alike, exploring topics using a practical approach to social deviance that is underpinned by frontier research findings, policy, and international trends. From the relationship between psychopathology and crime, and the characteristics of catathymia, compulsive homicide, sadistic violence, and homicide victimology, to adult sexual grooming, domestic violence, and honor killings, experts in the field provide insight into the areas of homicide, violent crime, and sexual predation. In all, more than 20 internationally recognized experts in their fields explore these and other topic, also including discussing youth offending, love scams, the psychology of hate, public threat assessment, querulencia, stalking, arson, and cults. This edited work is an essential reference for academics and practitioners working in any capacity that intersects with offenders and victims of crime, public policy, and roles involving the assessment, mitigation, and investigation of criminal and antisocial behavior. It is particularly ideal for those working in criminology, psychology, law and law enforcement, public policy, and for social science students seeking to explore the nature and character of criminal social deviance. Includes twenty chapters across a diverse range of criminal and antisocial subject areas Authored by an international panel of experts in their respective fields that provide a multi-cultural perspective on the issues of crime and antisocial behavior Explores topics from both victim and offender perspectives Includes chapters covering research, practice, policy, mitigation, and prevention Provides an easy to read and consistent framework, making the text user-friendly as a ready-reference desktop guide

Criminology is a broad-ranging and stimulating introduction that is ideal for undergraduates approaching the subject for the first time. Each chapter is written by an expert in their field and includes a range of learning features designed to help students engage with the material covered.

Cyber Crimes against Women in India reveals loopholes in the present laws and policies of the Indian judicial system, and what can be done to ensure safety in cyberspace. The book is a significant contribution to socio-legal research on online crimes targeting teenage girls and women. It shows how they become soft targets of trolling, online grooming, privacy infringement, bullying, pornography, sexual defamation, morphing, spoofing and so on. The authors address various raging debates in the country such as how women can be protected from cybercrimes; what steps can be taken as prevention and as recourse to legal aid and how useful and accessible cyber laws are. The book provides detailed answers to a wide array of questions that bother scholars and charts a way forward.

Victimology, Seventh Edition, introduces students to the criminal justice system in the United States and its impact on crime victims. Authors William Doerner and Steven Lab provide a fresh look at the theoretical basis of victimology and then present the key facets of crime and its effects. They examine financial and social costs both to the individual and to the larger community. This new edition uses the theoretical foundation of victimology to establish a clear conceptual framework and reduce repetition. Emerging trends in the field receive greater emphasis in this edition, including non-adversarial resolutions that offer remediation for crime victims. Crimes like intimate-partner violence and victimization in work or school environments continue to take a toll, and the authors examine efforts to prevent these crimes as well as responses after an incident occurs. Doerner and Lab challenge students to rethink the current response to crime victims, and to develop improved approaches to this costly social issue. Online supplements are available for both professors and students. A new chapter on explaining victimization provides context and a backdrop for examining emerging trends A new chapter on hate crimes delves into the complexities faced by victims as they negotiate the reporting process The text is supplemented by learning tools including chapter-by-chapter learning objectives, key terms, illustrative figures and tables, and call-outs to related Internet sites

The Routledge Handbook of Irish Criminology is the first edited collection of its kind to bring together the work of leading Irish criminologists in a single volume. While Irish criminology can be characterised as a nascent but dynamic discipline, it has much to offer the Irish and international reader due to the unique historical, cultural, political, social and economic arrangements that exist on the island of Ireland. The Handbook consists of 30 chapters, which offer original, comprehensive and critical reviews of theory, research, policy and practice in a wide range of subject areas. The chapters are divided into four thematic sections: Understanding crime examines specific offence types, including homicide, gangland crime and white-collar crime, and the theoretical perspectives used to explain them. Responding to crime explores criminal justice responses to crime, including crime prevention, restorative justice, approaches to policing and trial as well as post-conviction issues such as imprisonment, community sanctions and rehabilitation. Contexts of crime investigates the social, political and cultural contexts of the policymaking process, including media representations, politics, the role of the victim and the impact of gender. Emerging ideas focuses on innovative ideas that prompt a reconsideration of received wisdom on particular topics, including sexual violence and ethnicity. Charting the key contours of the criminological enterprise on the island of Ireland and placing the Irish material in the context of the wider European and international literature, this book is essential reading for those involved in the study of Irish criminology and international and comparative criminal justice.

This second edition of the Handbook of Victims and Victimology presents a comprehensively revised and updated set of essays, bringing together internationally recognised scholars and practitioners to offer substantial research informed overviews within their specialist fields of investigation. This handbook is divided into five parts, with each part addressing a different theme within victimology: Part I offers a scene-setting exploration of new developments in the field, enduring issues that remain relatively unchanged and the gaps and traps within the contemporary victimological agenda Part II examines of the complex dimensions to victim experiences as structured by gender, age, ethnicity, sexuality and intersectionality Part III reflects on the problems and possibilities of formulating policy responses in the light of the changing appreciation of the nature and extent of victimhood Part IV focused on the value of a comparative lens and the problems and possibilities of victim policies when seen through this lens, explored along three geographical axes: Europe, Australia and Asia Part V considers other ways of thinking about who counts as a victim and what counts as victimhood and extends the boundaries of the victimological imagination outward Building on the success of the previous edition, this book provides an international focus on cutting-edge issues in the field of victimology. Including brand new chapters on intersectionality, child victims, sexuality, hate crime and crimes of the powerful, this handbook is essential reading for students and academics studying victims and victimology and an essential reference tool for those working within the victim support environment.
