What Happened During The Holocaust?
The most dangerous part of the Holocaust
for innocent people was possibly the
period from 1944 to 1945. This was the
time when millions of people were

Barnaby Brocket is an ordinary eight-year-old boy in most ways, but he was born different in one important way: he floats. Unlike everyone else, Barnaby does not obey the law of gravity. His parents, who have a fear of being noticed, want desperately for Barnaby to be normal, but he can't help who he is. And when the unthinkable happens, Barnaby finds himself on a journey that takes him all over the world. Drifting from Brazil to New York, from Canada to Ireland, and even to space, the floating boy meets all sorts of different people--and discovers who he really is along the way. This whimsical novel will delight middle-graders, while readers of all ages will find themselves questioning what it means to be "normal."

the devastating consequences of environmental racism (Gerald Markowitz) -- and what we can do to remedy its toxic effects on marginalized communities. Did you know... Middle-class African American households with incomes between \$50,000 and \$60,000 live in neighborhoods that are more polluted than those of very poor white households with incomes below \$10,000. When swallowed, a lead-paint chip no larger than a fingernail can send a toddler into a coma -- one-tenth of that amount will lower his IQ. Nearly two of every five African American homes in Baltimore are plagued by lead-based paint. Almost all of the 37,500 Baltimore children who suffered lead poisoning between 2003 and 2015 were African American. From injuries caused by lead poisoning to the devastating effects of atmospheric pollution, infectious disease, and industrial

waste, Americans of color are harmed by environmental hazards in staggeringly disproportionate numbers. This systemic onslaught of toxic exposure and institutional negligence causes irreparable physical harm to millions of people across the country-cutting lives tragically short and needlessly burdening our health care system. But these deadly environments create another insidious and often overlooked consequence: robbing communities of color, and America as a whole, of intellectual power. The 1994 publication of *The Bell Curve* and its controversial thesis catapulted the topic of genetic racial differences in IQ to the forefront of a renewed and heated debate. Now, in *A Terrible Thing to Waste*, award-winning science writer Harriet A. Washington adds her incisive analysis to the fray, arguing that IQ is a biased and flawed metric, but that it is useful for

tracking cognitive damage. She takes apart the spurious notion of intelligence as an inherited trait, using copious data that instead point to a different cause of the reported African American-white IQ gap: environmental racism - a confluence of racism and other institutional factors that relegate marginalized communities to living and working near sites of toxic waste, pollution, and insufficient sanitation services. She investigates heavy metals, neurotoxins, deficient prenatal care, bad nutrition, and even pathogens as chief agents influencing intelligence to explain why communities of color are disproportionately affected -- and what can be done to remedy this devastating problem. Featuring extensive scientific research and Washington's sharp, lively reporting, *A Terrible Thing to Waste* is sure to outrage, transform the conversation, and inspire debate.
