A rule-based system is a system that applies

human-made rules to

store, sort and

manipulate data. In

doing so, it mimics

human intelligence. To

work, rule-based

systems require a set of

facts or source of data,

and a set of rules for

manipulating that data.

# File Type PDF Using Rule Based Design In

What is a rule-based system? What is it not ...

What first comes to my mind is the Gof' Design Pattern called Strategy.

You encode your rules in the Concrete Strategy objects. So you could have a particular

Concrete Strategy object that is changing in time.

But best is to change of Concrete Strategy

(eBTech) Introduction to  
Rule-based Applications  
Adrian Giurca,  
eBusiness Technologies,  
Craiova, March 2009

Dr. Adrian Giurca  
Brandenburg University  
of Technology Cottbus,  
Germany 2.

Introduction to Rule-  
based Applications  
In computer science, a  
rule-based system is

File Type PDF

Using Rule

Based store and

manipulate knowledge  
to interpret information  
in a useful way. It is

often used in artificial  
intelligence applications  
and research. Normally,

the term rule-based  
system is applied to  
systems involving

human-crafted or  
curated rule sets. Rule-  
based systems

constructed using

File Type PDF

Using Rule

Based Design In

inference, such as rule-based machine learning, are normally excluded

from this system type.

Rule-Based Design -

ResearchGate

A rules engine is a tool that makes it easier to program using this computational model. It may be a complete development environment, or a framework that can

File Type PDF

Using Rule

work with a traditional In  
platform. Most of what  
I've seen in recent years  
are tools that are  
designed to fit in with  
an existing platform.

RulesEngine - Martin  
Fowler

Rule-based  
programming paradigm  
emerged at that time as  
ways to implement  
systems that appear to

File Type PDF

Using Rule

Based and reason like In  
human beings.

Examples of rule-based  
systems are expert

systems that have the  
knowledge of a doctor  
or a tax advisor and can  
answer complex  
questions people would  
normally ask those  
professionals. The idea  
of rule-based  
programming is to  
represent a domain
