Best in Show is a collection of photographs of well-groomed and award-winning dogs by New York City-based photographer Dolly Faibyshev. The images from the Westminster Kennel Club Dog Show and beyond focus on the unique—and often humorous—relationship between each dog and their handler. Dolly Faibyshev focuses on kitsch, irony, and the larger than life human and canine characters that make up Best in Show. The result is a colorful, vibrant, campy, and satirical take on this specific slice of Americana.

- The colorful, closely cropped juxtapositions of each coiffed canine contestant and their dedicated human are both humorous and charming.
- Sure to delight fans of all breeds of dogs
- A universal and ideal book for all canine lovers with a sense of humor Best in Show captures a specific subculture of dog devotees primarily from the infamous Westminster Kennel Club Dog Show at Madison Square Garden in New York.
- A perfect book for anyone who is completely and totally obsessed with dogs and the Westminster Kennel Club Dog Show
- Photographers and contemporary art lovers will also love this celebration of Dolly Faibyshev's work
- Great for fans of The Dogist: Photographic Encounters with 1,000 Dogs by Elias Weiss Friedman, Dogs by Lewis Blackwell and Tim Flach, and Underwater Dogs by Seth Casteel

Based on ethnographic and policy data collected over a ten-year span at a university in the People's Republic of China, this book analyses the history of English Language Teaching (ELT) policies in Chinese higher education. The book uses the university as a lens in which to investigate the creative imaginations and divergent (re)appropriations of teaching methods, learning materials, and language use in the Chinese ELT context. Book chapters move beyond mere descriptions of tensions and point to the local understandings and practices of English teachers (both local and foreign) and students. Working together, these teachers and students are constantly articulating new social and political conditions and meanings outside and inside given discourses and traditions of ELT. The book's main argument is that these multiple stakeholders must be given a more prominent role in shaping policy and curriculum at universities and other English language contexts around the world.

Written by a team of world-renowned artists, researchers and practitioners - all pioneers in using augmented reality based creative works and installations as a new form of art - this is the first book to explore the exciting new field of augmented reality art and its enabling technologies. As well as investigating augmented reality as a novel artistic medium the book covers cultural, social, spatial and cognitive facets of augmented reality art. Intended as a starting point for exploring this new fascinating area of research and creative practice it will be essential reading not only for artists, researchers and technology developers, but also for students (graduates and undergraduates) and all those interested in emerging augmented reality technology and its current and future applications in art.

Map the innovation space—and blaze a path to profits and growth Countless books, articles, and other advice promise leaders solutions to the complex challenges they face. Some offer quick, silver-bullet remedies—a straight line to success!—and some are so technical that readers get lost before they begin. Now, there's Mapping Innovation, a refreshing alternative in the crowded business innovation space. Engaging and informative without sacrificing substance and expertise, this groundbreaking guide provides thorough background on some of the greatest innovations of the past century as well as . It details the processes that advanced them from inception to world-changing products—and shows you how to replicate their success. Business innovation expert Greg Satell helps you find your way by revealing the four models of innovation: Basic Research, Breakthrough Innovation, Sustaining Innovation, and Disruptive Innovation. One size does not fit all, so he provides a framework—the Innovation Matrix—for discovering which "type" of innovation process best suits the problem you need to solve. It's about asking the right questions, so that you can apply the right strategies to the problems you need to solve. In the end,

you'll have a crystal clear model for disrupting the marketplace, scaling your efforts to propel your enterprise forward, and leverage digital platforms to your advantage. Mapping Innovation offers a simple and accessible but powerful approach to developing a strategy that will put you light years ahead of the competition!.

A comprehensive overview of detonation nanodiamond particles produced by detonation of carbon-containing explosives, this book discusses the technology of synthesis and the effect of various technological parameters on the structure and physicochemical properties of nanodiamonds. It explores the possibilities of targeted chemical modification of the surface, describes methods of structural modification of nanodiamonds aimed at obtaining nanographite, analyzes the various methods employed in studies of nanodiamonds as a carbon nanostructure, and suggests and explores at length the potential of nanodiamond application in technology and medicine.

A music-career book like no other, *The Music Producer's Survival Guide* offers a wide-ranging, exploratory, yet refreshing down-to-earth take on living the life of the independent electronic music producer. If you are an intellectually curious musician/producer eager to make your mark in today's technologically advanced music business, you're in for a treat. This new edition includes industry and technological updates, additional interviews, and tips about personal finances, income, and budgets. In this friendly, philosophical take on the art and science of music production, veteran producer, engineer, and teacher Brian Jackson shares clear, practical advice about shaping your own career in today's computer-centric "home-studio" music world. You'll cover music technology, philosophy of music production, career planning, networking, craft and creativity, the DIY ethos, lifestyle considerations, and much more. Brian's thoughtful approach will teach you to integrate your creative passion, your lifestyle, and your technical know-how. *The Music Producer's Survival Guide* is the first music-production book to consider the influence of complexity studies and chaos theory on music-making and career development. It focuses on practicality while traversing a wide spectrum of topics, including essential creative process techniques, the TR-808, the proliferation of presets, the butterfly effect, granular synthesis, harmonic ratios, altered states, fractal patterns, the dynamics of genre evolution, and much more. Carving out your niche in music today is an invigorating challenge that will test all your skills and capacities. Learn to survive—and thrive—as a creative-technical professional in today's music business, with the help of Brian Jackson and *The Music Producer's Survival Guide*!

Good management is a precious commodity in the corporate world. Guide to Management Ideas and Gurus is a straight-forward manual on the most innovative management ideas and the management gurus who developed them. The earlier edition, Guide to Management Ideas, presented the most significant ideas that continue to underpin business management. This new book builds on those ideas and adds detailed biographies of the people who came up with them-the most influential business thinkers of the past and present. Topics covered include: Active Inertia, Disruptive Technology, Genchi Genbutsu (Japanese for "Go and See for Yourself"), The Halo Effect, The Long Tail, Skunkworks, Tipping Point, Triple Bottom Line, and more. The management gurus covered include: Dale Carnegie, Jim Collins, Stephen Covey, Peter Drucker, Philip Kotler, Michael Porter, Tom Peters, and many others.

Design Transactions presents the outcome of new research to emerge from 'Innochain', a consortium of six leading European architectural and engineering-focused institutions and their industry partners. The book presents new advances in digital design tooling that challenge established building cultures and systems. It offers new sustainable and materially smart design solutions with a strong focus on changing the way the industry thinks, designs, and builds our physical environment. Divided into sections exploring communication, simulation and materialisation, Design Transactions explores digital and physical prototyping and testing that challenges the traditional linear construction methods of incremental refinement. This novel research investigates 'the digital chain' between phases as an opportunity for extended interdisciplinary design collaboration. The highly illustrated book features work from 15 early-stage researchers alongside chapters from world-leading industry collaborators and academics.

This book discusses the current trends in and applications of artificial intelligence research in intelligent systems. Including the proceedings of the Artificial Intelligence Methods in Intelligent Algorithms Section of the 8th Computer Science On-line Conference 2019 (CSOC 2019), held in April 2019, it features papers on neural networks algorithms, optimisation algorithms and real-world issues related to the application of artificial methods.
